

Having lived for two years in our independent living apartment here at Springhill, my husband and I are convinced that this was the best possible move for us.

Sid had a triple bypass followed by carotid surgery in 2007. Recovery was good and we resumed our usual activities. Then in 2011 he had a massive stroke, leaving him with right side weakness, severely impaired speech and poor short-term memory.

For two years our family gladly took over. They furnished transportation and took care of our home maintenance, lawn care, and finances. This was while also caring for their own homes and families.

At the recommendation of our daughter (who happens to be a 10 year associate at Springhill) we began attending some marketing events here. After encouragement by our family and the very helpful marketing associates, we decided to make Springhill our home. The continuing care feature was a bonus.

From beautiful grounds to friendly and helpful associates and residents to all the amenities available, we are so thankful that we can spend the rest of our days knowing we are safe and secure.

Sincerely,

A handwritten signature in cursive script that reads "Sid and Norma".

Sid and Norma Saxton
